

# ABSTRACT

CAW supporter (CAWELON) is a fan token that supports CAW, a mysterious cryptocurrency that has a connection with Elon Musk. CAWELON aims to create a loyal and active community of CAW holders and fans, and to reward them with Wrapped ETH and token burns. CAWELON also plans to use KOLs and social media platforms to promote its project and increase its exposure. CAWELON is an ERC-20 token that will be launched on March 25, 2024, and will be listed on UNISWAP and other major exchanges. CAWELON is currently conducting a pre-sale for its initial investors, and will also distribute 10 billion CAWELON to its open chat and telegram members.

# INTRODUCTION

## What is CAW?

CAW is a cryptocurrency that was launched in 2018, and has been shrouded in mystery ever since. CAW claims to be the next generation of blockchain technology, and to have a revolutionary consensus mechanism that can achieve high scalability, security, and decentralization. CAW also claims to have a secret partnership with Elon Musk, the founder of Tesla and SpaceX, and to be involved in his ambitious projects such as Starlink and Neuralink. However, CAW has not revealed any details or proofs of its claims, and has only communicated with its followers through cryptic messages and ciphers.

## What is CAWELON?

CAWELON is a fan token that supports CAW and its vision. CAWELON was created by MASASHI KURODA, a passionate CAW holder and community leader, who has been researching and disseminating information about CAW since its inception. CAWELON aims to create a loyal and active community of CAW holders and fans, and to reward them with Wrapped ETH and token burns. CAWELON also plans to use KOLs and social media platforms to promote its project and increase its exposure. CAWELON is an ERC-20 token that will be launched on March 25, 2024, and will be listed on UNISWAP and other major exchanges.

# TOKENOMICS

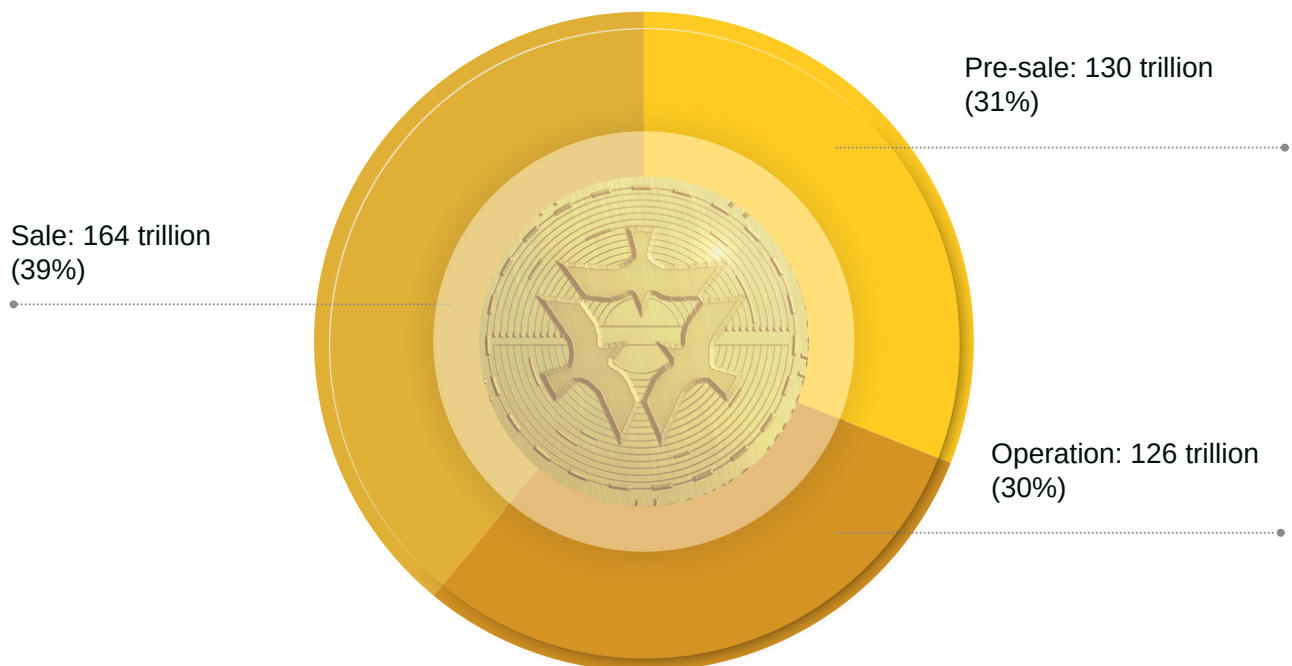

## Token Specification

CAWELON is an ERC-20 token that follows the standard specifications of the Ethereum network. The token name is [CAW supporter], and the symbol is CAWELON. The maximum supply of CAWELON is 420 trillion, and the decimal places are 18.

## Token Distribution

The token distribution of CAWELON is as follows:

- Pre-sale: 130 trillion (31%)
- Operation: 126 trillion (30%)
- Sale: 164 trillion (39%)

The pre-sale tokens include the tokens sold to the initial investors and the tokens distributed to the open chat and telegram members. The operation tokens are reserved for the project development, management, and promotion. The sale tokens are the tokens that will be listed on the exchanges and available for the public to buy and sell.

## Token Price

The pre-sale price of CAWELON is \$0.000000001 per token. The pre-sale will end as soon as \$100,000 worth of CAWELON is sold, or by 2024/00/00 whichever comes first. There will be no second sale. The launch price of CAWELON will be determined by the market demand and supply, and may vary depending on the exchange.

## Token Reward

CAWELON rewards its holders with Wrapped ETH, a tokenized version of Ethereum that can be easily exchanged for other cryptocurrencies or fiat currencies. Every time someone buys CAWELON, 4% of the transaction amount will be distributed to all CAWELON holders as Wrapped ETH. This means that the more CAWELON you hold, the more Wrapped ETH you will receive.

## Token Tax

CAWELON charges a tax on every transaction, which is used to fund the token reward, the token burn, and the project operation. The tax rate is 8% for both buying and selling transactions. The tax breakdown is as follows:

**Sell tax: 8%** (4%  
CAW burn, 4%  
CAWELON burn)

**Buy tax: 8%** (4%  
reward, 2% buyback  
and burn, 2% operation)

# ROADMAP

## Q4 2023:

Pre-sale, open chat and telegram launch, website launch, white paper release, KOL promotion

## Q1 2024:

Token launch, UNISWAP listing, CMC and CG listing, social media marketing, community building
